About this summary

1. This summary brings together data from a number of sources, all of which are available elsewhere within the Neighbourhood Statistics website. More detailed information on these topics and others, is available within the site and can be viewed through a number of ways.

- by subject;
- by a list of areas;
- by using the interactive map.

2. In some cases the data shown in this summary may have been rounded and figures shown may differ slightly from those published elsewhere. Due to rounding of percentages, the addition of categories may not sum to exactly 100 per cent in all cases. It should also be noted that in some cases, different tables may show different counts for the same population, due to disclosure protection measures used to prevent the inadvertent disclosure of information about identifiable individuals. Figures quoted should therefore be used for guidance only.

3. These summary statistics are based on administrative ward boundaries legally in force at the end of 2002, which includes ward boundaries that became operative in a number of Local Authorities in May 2003, and some others that will become operative in May 2004.
